

CEMUS

Global Challenges and Sustainable Futures

Fall 2021

Course Books

During the course, we will use weekly learning material, in addition to the two course books. On Studium, the online learning environment, you will find 1-3 texts, videos, audio files and/or other learning material per week. Just click on the specific session under “Modules” to find the literature and videos for that day.

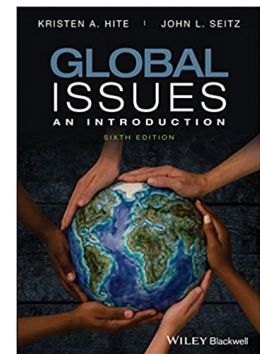

There are two mandatory course books which will be used throughout the course: “Global Issues: An Introduction” and “From What Is to What If”. There are copies of both books available at the CEMUS library, in the Geocentrum building, which can only be read in the CEMUS library and cannot be loaned out. Of each book, there are also printed copies or eBooks available at the Uppsala University library, which can be reserved and accessed through the library website, at ub.uu.se . Both books are also available for purchase at www.bokus.com.

Global Issues: An Introduction

By John L. Seitz and Kristen A. Hite. 6th edition, 2020. ISBN 978-1119538509

This book is an introduction to many of the most important environmental, economic, social, and political concerns of modern life.

IMPORTANT: please make sure you have the latest update (the sixth edition). Global issues are a constantly changing topic and we'll be using the latest edition of this text.

From What Is to What If

Unleashing the Power of Imagination to Create the Future We Want

By Rob Hopkins, Published 2019. ISBN 1603589058

From What Is to What If is a call to action to reclaim and unleash our collective imagination, told through the stories of individuals and communities around the world who are doing it now, as we speak, and witnessing often rapid and dramatic change for the better.
