

CEMUS

Examination Schedule Sustainable Economic Futures - Spring 2023

Assessment requirements for Sustainable Economic Futures, according to the [course syllabus](#), are as follows:

The student is examined through written preparation for (4 credits) and active participation in seminars and workshops (3 credits), and through written documentation (7 credits) and oral presentation (1 credit) of a project.

Sustainable Economic Futures is a graded course. The graded component of the course is determined by the final individual written assignment as marked below.

The course learning outcomes are the following:

1. *summarise and reason on central theories, concepts, definitions regarding sustainable economic systems in relation to contemporary and future sustainability challenges;*
2. *account for and critically relate to how different economic sustainable systems can be designed and realised at different levels and by different actors;*
3. *from an interdisciplinary system perspective account for the ecological, economic and social conditions and the foundations of a sustainable economic system;*
4. *apply an ethical and justice perspective on practical issues concerning the design and implementation of future sustainable economic systems;*
5. *evaluate and analyse the consequences of various proposals for future economic systems in a larger sustainability context;*
6. *communicate in writing and orally questions concerning sustainable economic systems;*
7. *initiate, plan, implement and evaluate a delimited project work within the course area.*

Learning outcomes #1 and #6 will be evaluated throughout the course. The remaining learning outcomes will be evaluated as stated below:
